Jeremy Trindade (Jet)

Data Engineering Professional in Training
Viseu, Portugal · +351 910 473 110 · jeremystrindade@gmail.com
linkedin.com/in/jeremystrindade · github.com/jeremystrindade · jeremystrindade.com

PROFESSIONAL PROFILE

Self-directed professional transitioning into Data Engineering, with a structured preparation roadmap built around the technologies used in modern enterprise data platforms. After overcoming personal challenges, I am now fully focused on building a long-term career in technology. Currently developing hands-on portfolio projects simulating real-world data workflows covering ingestion, transformation, and orchestration. Academic training in Computer Science running in parallel via University of the People (BSc) and Harvard CS50. Goal: to contribute to data-driven transformation initiatives within a consulting environment.

TECHNICAL SKILLS IN TRAINING

Currently developing through a structured roadmap aligned with enterprise data engineering requirements.

- Python
- Apache Airflow
- ETL / ELT Pipelines
- SQL / PostgreSQL
- Microsoft Azure
- Data Lakes & Warehouses
- Apache Spark / PySpark
- Databricks / Delta Lake
- Git / GitHub

PROFESSIONAL EXPERIENCE

Founder / Independent Professional · Jeremy Trindade Unipessoal Lda — *Nov 2021 — Present*

- Managed independent business operations and strategic decision-making
- Developed strong problem-solving, analytical thinking, and self-management skills
- Built discipline, autonomy, and accountability in a self-directed environment

Manager & IT Support · Burger King®, Mantes-la-Jolie, France — *Oct 2016 — Oct 2021*

- Led daily operations and team coordination across high-pressure environments
- Supported IT-related operational systems and troubleshooting
- Developed process optimisation and fast decision-making skills

PORTFOLIO PROJECTS

Production-Ready Pipeline Template
Git, SDLC
✓ Completed

Foundational repository template enforcing standardised folder structure, logging boilerplates, and SDLC practices across all pipeline projects.
github.com/jeremystrindade/data-engineering-project-template

Portfolio Website & Infrastructure
HTML, CSS, JS, GitHub Pages, Cloudflare, DNS
✓ Completed

Designed and deployed a personal portfolio site with custom domain, DNS configuration, CDN setup via Cloudflare, and SSL provisioning.
jeremystrindade.com

Automated Data Ingestion Pipeline
Python, REST APIs, PostgreSQL, Airflow
In development

ETL pipeline ingesting REST API data, applying transformations, and storing output in PostgreSQL with Airflow scheduling.
github.com/jeremystrindade/data-pipeline-python-sql

Large-Scale Processing with PySpark
Apache Spark, PySpark, Spark SQL
In development

Distributed processing of large public datasets using PySpark transformations.
github.com/jeremystrindade/big-data-processing-pyspark

Cloud Pipeline: Azure & Databricks
Azure Data Factory, ADLS, Databricks, Delta Lake
In development

End-to-end cloud data pipeline using Azure Data Factory, Data Lake, and Databricks.
github.com/jeremystrindade/azure-data-engineering-pipeline

Data Warehouse & Analytics Model
SQL, PostgreSQL, Python, star schema
In development

Star schema data warehouse with analytical SQL modeling for BI workloads.
github.com/jeremystrindade/data-warehouse-analytics-model

EDUCATION & ACADEMIC DEVELOPMENT

University of the People | B.S. in Computer Science *Expected 2030*

- Pursuing a comprehensive degree in software engineering, algorithms, and data structures.

Harvard University (edX) | CS50: Introduction to Computer Science *In Progress — Expected 2026*

- Intensive introduction to the intellectual enterprises of computer science and the art of programming (C, Python, SQL, and JavaScript).

Universidade Fernando Pessoa | Undergraduate Coursework, Software Engineering

- Completed foundational university-level curriculum including Object-Oriented Programming and Systems Architecture.

Universidade Fernando Pessoa | Undergraduate Certificate, Health Information Systems

- One-year technical specialization focused on healthcare data management, IT infrastructure, and clinical information systems.

DATA ENGINEERING COURSES (IN PROGRESS)

- 100 Days of Code: Python Pro Bootcamp (Udemy)
- Spark and Python for Big Data with PySpark (Udemy)
- Azure Databricks & Spark SQL (Udemy)
- SQL for Data Analytics & Business Intelligence (Udemy)
- Master Apache Airflow — Hands-On (Udemy)
- Azure Data Engineering MasterClass (Udemy)

PRIOR CERTIFICATIONS

Web development, databases, and IT fundamentals — completed as part of independent learning prior to current Data Engineering focus.

- O curso completo de Banco de Dados e SQL (Udemy)
- Formation Complète Développeur Web (Udemy)
- Introduction au Développement Web (Udemy)
- Comprendre le Web (OpenClassrooms)
- Virtualização com Oracle VirtualBox do zero! (Udemy)
- Gérez votre code avec Git et GitHub (OpenClassrooms)
- PHP — Le Cours Complet (Udemy)
- Apprenez à créer votre site web avec HTML5 et CSS3 (OpenClassrooms)
- Code Your First Game in JavaScript (Udemy)
